**Efficiency Quality Ethics**

### Clinical Monitoring and Site Management

We monitor and manage clinical trials. Initiation, monitoring and close out visits are run according to sponsors' requirements and reporting methods, documented in the Clinical Monitoring Plan. Our experience ranges from Phase I-IV trials across a range of organisations and therapeutic areas.

- Study Start-up and Contracts Negotiations
- Medical Monitoring
- Investigator Site Capacity Development
- Site Operations
- Patient Recruitment

### Clinical Project Management Services

**Investigator Site Capacity Development:** We provide advisory and help site to complete all phases of a site development: including but not limited to Site assessment and qualification, staffing, routine monitoring, study close-out, among others

**Site Operations :** Clinwin will partner, collaborate and support sites in their day-to-day activities of the site, ensuring those activities are managed with the ultimate goal of running ICH GCP and applicable regulatory requirements compliant clinical research projects.

### Project Finance Management Services

ClinWin provides the Project and Finance Management services not limited to :

- Budget proposal development including costing
- Grant management
- Donor financial reporting
- Training on grant management, bookkeeping and reporting
- Simple book keeping and financial reporting tools
- Data Management Services

### Health Systems Research

- Health Services effectiveness
- Social Science Research,
- Health Policy analysis,
- Health Services delivery,
- Health care organizational development

### Training and Capacity Development

At ClinWin we believe information is power and well trained study staff deliver projects on quality, time and cost, avoiding consistent errors and queries which can affect study implementation. We offer clinical research for the Study Co-ordinators, Clinical Research Associates, Investigators, Research site Project Managers and Staff, Sponsors and others.
